Notes from CST & RS Advisory Group

October 2026

No formal meetings were held however it was decided to put forward a proposal to purchase 2 solar powered Vehicle Activated Signs (VAS) these are to replace the current battery operated signs on Old Worcester Road, which are now past there sell by date with the batteries needing constant replacement

An informal discussion was held with John Cosham, Jan Hipkins and Sgt Pat Holland West Mercia Police regarding the parking by the primary school and the implications of a one way system on Inn Lane. This was discussed at length 4 years ago and was found to be impractical by WCC Highways. Now we have established a good communication with that department we can get all parties to have another look at solutions.

Vegetation around the existing VAS has been cleared back by Simon Fox

No parish priorities have been identified to enable the police to monitor any particular areas

Cllr Cosham, Cllr Hipkin, Kate Radford Community Police Team and Kerri Stones Platform Housing Neighbourhood Officer meet on the village green to answer residents concerns and queries

Damage to the VAS on Stourport Rd by Bells Farm was also discovered, it appears that the unit whilst still functioning has been hit by passing vehicle and the casing has serious cracks. It will need to be taken away for assessment
